These grades 3–5 curriculum modules are designed to address CCSS ELA outcomes during a one-hour English Language Arts block. The overarching focus for all modules is on building students’ literacy skills as they develop knowledge about the world.

Taken as a whole, these modules are designed to give teachers concrete strategies to address the “instructional shifts” required by the CCLS.

Structure of a Module

- Each module provides eight weeks of instruction, broken into three shorter units. Each module includes seven assessments:
 - Six unit-level assessments that almost always are on-demand: students’ independent work on a reading, writing, speaking, or listening task.
 - One final performance task that is a more supported project, often involving research.

Structure of a Year of Instruction

- There are six modules per grade level.
- Of these six modules, teachers would teach four: Module 1, followed by either Module 2A or 2B, then either 3A or 3B, then Module 4.
- Teachers should begin the year with Module 1, which lays the foundation for both teachers and students regarding instructional routines.
- For Modules 2 and 3, option B formally assesses all standards formally assessed in Option A (and possibly some additional standards as well).
- Option 2B specifically includes supplemental lessons with explicit writing instruction aligned with NYSP12 ELA CCLS L1–3 and with Reading Foundations instruction aligned with NYSP12 ELA CCLS RF.5 and RF.6. These lessons are intended as models of the type of robust instruction that teachers need to incorporate in their literacy time beyond the bounded “one-hour per day” of the NYS modules.

How to Read This Document

The purpose of this document is to provide a high-level summary of each module and name the standards formally assessed in each module.

- **Module focus:** Read this first. The “focus” is the same across the grades 3-5 band and signals the progression of literacy skills across the year as well as alignment to the CCSS instructional shifts.
- **Module title:** This signals the topic students will be learning about (often connected to social studies or science) and aligns with Instructional Shift #2, building knowledge in the disciplines.
- **Description:** These three or four sentences tell the basic “story” of the eight-week arc of instruction: the literacy skills, content knowledge, and central text.

- **Texts:** This lists texts that all students read. The text in bold is the extended text for a given module: the text(s) with which students spend the most time. Remember that texts can be complex based on both qualitative and quantitative measures. Texts are listed in order from most quantitatively complex (based on Lexile measure) to least quantitatively complex. Texts near the bottom of the list are often complex in ways other than Lexile. Within a given module, the list shows the wide variety of texts students read as they build knowledge about a topic. This aligns with Instructional Shift #2, building knowledge in the disciplines.
- **Final Performance Task:** This is a culminating project, which takes place during Unit 3 of every module. Performance tasks are designed to help students synthesize and apply their learning from the module in an engaging and authentic way. Performance tasks are developed using the writing process, are scaffolded, and almost always include peer critique and revision. Performance tasks are not “on-demand” assessments. (Note: The end of Unit 3 assessment often addresses key components of the performance task.)
- **Unit-Level Assessments**
 - Each unit includes two assessments, most of which are “on-demand” (i.e., show what you know/can do on your own).
 - Mid-unit assessments typically, though not always, are reading assessments: text-based answers.
 - End of unit assessments typically, though not always, are writing assessments: writing from sources.
 - Most assessments have a heavy emphasis on academic vocabulary, particularly determining words in context.
 - Assessments are designed to be curriculum-embedded opportunities to practice the types of skills needed on the NYS assessment.
 - The curriculum map below lists the title of each assessment, the standards assessed, and the assessment format.
 - Selected response (multiple-choice questions)
 - Short constructed-response (short-answer questions of the type that is scored using the NYS 2-point rubric)
 - Extended response (longer writing or essays of the type that is scored using the NYS 4-point rubric) (either on-demand or supported)
 - Speaking and listening (discussion or oral presentation)
 - Scaffolded essay (involving planning, drafting, and revision)
- **Standards:** In each module, the standards formally assessed are indicated with a check mark; see details below.

Module Title	Native Americans in New York	Interdependent Roles in Colonial Times	TO COME	Simple Machines	The American Revolution	Suffrage and the Leadership of Susan B. Anthony
Description	Students learn about Native Americans in New York, with a specific focus on the Iroquois Confederacy. Students read short sections of the Iroquois Constitution, or “Great Law of Peace,” learn to write explanatory paragraphs, study a novel and write a literary analysis, and then connect the past to the present by studying data designed to help them think about places in their school where agreements like those found in the Iroquois Constitution would benefit the school community. As the final performance task, students collaborate to write a class constitution, drawing on the texts they have read.	Students learn about what life was like in Colonial America, focusing on how colonists were interdependent on one another. Students read about various colonial trades (such as the wheelwright, the cooper, etc.), with an emphasis on making inferences, summarizing informational texts and conducting basic research. As the final performance task, students synthesize information from multiple sources as they write a research-based narrative that vividly describes an event in a colonist’s life.	TO COME	Students build knowledge of simple machines and how they affect force, effort, and work. Students read basic background text and perform a short Readers Theater about simple machines (written for classroom use). They then read an extended scientific text, <i>Simple Machines: Forces in Action</i> (870L), focusing on analyzing scientific concepts. In small groups, students develop expertise about specific simple machines (inclined plane, levers, pulleys, etc.), read and conduct science experiments using simple machines, and synthesize their findings by writing scientific conclusion statements. They conduct a “simple machine inventory” at school and home. As a final performance task, students write an editorial to an engineering magazine expressing an opinion about which simple machine benefits people most in their everyday lives.	TO COME	Students learn about voting rights and responsibilities. They first focus on the women’s suffrage movement and the leadership of New Yorker Susan B. Anthony, reading firsthand and secondhand accounts of her arrest and trial. Then students read <i>The Hope Chest</i> (historical fiction set in the weeks before the passage of the 19th Amendment) examining the theme of leaders and their impact on others. Finally, students connect the theme of leadership to their own lives by reading about the importance of voting in modern times. As a final performance task, students draft and then create a public service announcement (using VoiceThread technology) to state their opinion to high school seniors about why voting is important.

NYSP12 ELA CCLS Standards Formally Assessed, by Module

- In the curriculum map below, any specific CCLS with a check mark indicates formally assessed.
- Some standards are formally assessed in multiple modules.
- “B” modules will assess all the same standards as “A” modules but may address additional standards as well.
- Because of the integrated nature of the standards, even standards that are not formally assessed are often embedded in instruction throughout every module (e.g., RI/RL.1).
- Some standards are not applicable in an on-demand assessment context (e.g., R.10 or W.10). In the curriculum map below, these standards are noted as “integrated throughout.”
- Some standards (e.g., W.2) have a main or “parent” standard and then subcomponents (e.g., W.2a). Often, students’ mastery of the entirety of this standard is scaffolded across multiple modules. Therefore, in the curriculum map below, the “parent” standard is checked only if all components of that standard are formally assessed within that particular module. Otherwise, just the specific components are checked.
