

Guidelines for Completing Answer Grids
Spring 2018 MCAS Paper-Based Mathematics Tests
for Grades 3–5

Parts of an Answer Grid

How to Complete an Answer Grid in Grades 3–5:

1. Work the problem and find the answer.
2. Write your answer in the answer boxes at the top of the answer grid.
 - As long as there are no spaces *within* the digits of your answer, you may print your answer on the left side, the right side, or in the middle of the grid. Make sure there are no spaces *within* the digits of your answer.
 - Print only one digit or symbol in each box.
 - Do not leave a blank box in the middle of your answer.
 - Fractions cannot be entered into an answer grid. Enter fractions as decimals.
 - Be sure to write a decimal point in its own answer box if it is a part of your answer.
 - In larger numbers, do not use commas since there is no way to fill in a bubble for a comma.
 - You may include leading zeros in decimal answers but you are not required to do so.
 - Other than a leading zero in a decimal, do not add any other zeros to your answer.
3. Under each answer box, fill in the circle that matches the number or symbol you wrote above.
 - Make a solid mark that completely fills the circle.
 - Do not fill in a circle under an unused answer box.
 - You must fill in the circles accurately to receive credit for your answer.
4. If you need to change an answer, be sure to erase your first answer.
